MONTHLY REPORT

25X1

PAR 216

22 Jan 65

SUBJECT: Exposure of Photographic Material with Lasers

TASK/PROBLEM

1. Determine the manner and degree of the interaction of present and predictable future photographic films with coherent radiation from laser sources in red and near IR spectrum ranges.

DISCUSSION

2. The rough draft of the final report, PAR 216, Exposure of Photographic Material with Lasers, has been completed.

PLANNED ACTIVITY

3. Publication of the final report in the next period will constitute project termination.
